PART I--FINANCIAL INFORMATION

Item 1. Financial Statements.

The Financial Statements for the quarter and period ended **June 30, 2010** are contained herein.

MANAGEMENT DISCUSSION AND ANALYSIS OF RESULTS OF CONSOLIDATED OPERATIONS AND CONSOLIDATED FINANCIAL CONDITION FOR THE QUARTER AND PERIOD ENDED JUNE 30, 2010.

I. RESULTS OF OPERATIONS

1H 2009 – 1H 2010

DMCI Holdings, Inc. (the "Company") reported a jump of 94% in its consolidated first half net income (after minority interest) from P2.156 billion in 2009 to P4.181 billion in 2010. The inclusion of the new power generation business boosted the already significant growth in the construction, real estate and mining businesses. These along with the maintained results from water investments all contributed to the impressive bottom line.

Below is a table on the 1st half net income contributions of the Company's businesses for 2010 and 2009:

(amount in Php millions)	**1H 2010**		**1H 2009**		**Variance**	
Construction	945	23%	325	15%	620	191%
Mining	830	20%	407	19%	423	104%
Real Estate	764	18%	299	14%	465	156%
Water	906	22%	1,121	52%	(215)	(19%)
Power	735	18%	(6)	0%	741	12,350%
Parent & Others	-	0%	10	0%	(10)	(100%)
Total	**4,180**	100%	**2,156**	100%	**2,024**	94%

The significant first half for the Calaca power plant, the realization of works for the big ticket construction projects, the recognition of real estate sales, and the growing coal deliveries to both exports and domestic customers caused the steep growth in consolidated net income. The water business registered a slight 19% decrease as a result of non-recurring extraordinary items.

WATER

The Company's investment in the water sector is recognized through a consortium with Metro Pacific Investments Corp. (MPIC) and operated through the water utility for the west portion of Metro Manila: Maynilad Water Services, Inc. (Maynilad). Despite a spike in operations, first half net contributions from the water business slightly reduced to P906 million in 2010 compared to P1.1 billion in 2009 as extraordinary items at the Maynilad level and consortium adjustments bloated 2009 amounts.

Below is a table which details the breakdown of the consolidated 1st half operating results of the water investments of the Company:

(in Php millions)	1H 2010		1H 2009	
	Consortium	**DMCI share**	**Consortium**	**DMCI share**
Maynilad (Operating) Level				
Core Net Income	2,451	1,029	1,276	536
Forex & Extraordinary Items	(23)	(10)	1,040	437
Maynilad Net Income	2,428	1,019	2,316	972
Minority	(142)		(136)	
Attributable Net Income after Minority	2,286	**1,019**	2,180	**972**
Consortium Adjustments:				
Fair Value/ Goodwill Amortization	(268)	**(120)**	(477)	**(213)**
Prior Period Adjustments		**-**	635	**283**
ESOP Provision	31	**14**	-	**-**
Forex Gain (Losses)	(47)	**(21)**	18	**8**
Unrecognized Actuarial Gains		**-**	(117)	**(52)**
Concession Fee Adjustments	44	**20**	(76)	**(34)**
Bid & Other Costs		**-**	(6)	**(3)**
Tax Adjustments		**-**	311	**139**
Other Adjustments	(15)	**(7)**	46	**21**
Subtotal	(255)	**(114)**	334	**149**
Net Income (Loss)	**2,031**	**906**	**2,514**	**1,121**

Water operating efficiencies continued to improve as Maynilad reported a 92% increase in first half core net income from P1.3 billion in 2009 to P2.4 billion in 2010, of which DMCI's beneficial share is P536 million and P1 billion respectively. Billed volume for the period was up 9.5%, despite a 4.8% dip in water supply. Year to date non-revenue water (NRW) slid from 60.9% last year to 55% this year. Billed services also grew 8.9% to 846,682 accounts. As a result, Maynilad water service revenues were up by P1 billion, a 23.9% increase from last year. Non-cash opex showed a 24% reduction coming mainly from the reduced amortization of concession assets which despite capital expenditures shrank due to the extension of Maynilad's concession period. Cash opex, on the other hand, reported a 15% growth due to the following: (a) higher electricity rates and consumption, (b) increase in cost of outsourced activities, (c) growth in real estate tax along with repairs & maintenance costs from increase in assets acquired in line with higher asset levels from capex programs.

Although dampened by the extraordinary income items from last year, the certain and inevitable growth from the Maynilad operations is providing the Company confidence that its water investment will soon become not just a significant income contributor but also a cash generating segment.

CONSTRUCTION

The construction business almost tripled its net contributions for the period from P325 million last year to P945 million this year. Construction and engineering works for local buildings and domestic infrastructure projects added to the foreign steel fabrication contracts resulting in the huge increase.

General Construction

The general construction unit, operated under wholly-owned and flagship construction company, D.M. Consunji, Inc. (DMCI), registered 1st semester net contributions of P616 million, improving 2.64 times from the P233 million last year as construction and engineering works from the elevated toll road project, Skyway, reached full activity.

Works from the major contracts: Skyway, 168 Residences and Raffles Hotel (worth P15 billion) caused the huge 128% increase in DMCI construction revenues from P5.8 billion to P2.5 billion this year. Building construction revenues this period was slightly up from P971 million in 2009 to P1.2 billion in 2010, but now accounted for only 20% of general construction revenues from 38% the previous year. Below is a table on the significant DMCI building contracts for the first half of 2010 and 2009:

(in Php millions)

Building Projects	Contract Amount	Booked Revenues		Variance (%)
		1H2010	1H2009	
Raffles/Fairmont	4,585	589	451	38%
168 Residences	3,096	458	124	269%
Moldex Grand Towers	686	106	155	-32%

Infrastructure development, now a driving force for the country's economic growth was evident as DMCI infrastructure revenues (including waterworks) for the 1st semester totaled P3.4 billion up by 140% from the P1.4 billion last year. A breakdown of the major infrastructure projects for the 1st half of 2010 and 2009 is illustrated below:

(in Php millions)

Infra Projects	Contract Amount	Booked Revenues		Variance (%)
		1H2010	1H2009	
Skyway	7,186	2,233	553	304%
LRT1	1,078	100	247	-60%
Maynilad	3,133	1,063	340	212%

Contributions from the other independent construction units such as external electrical works, equipment management (sales and rentals), ready-mix concrete sales (external), and manpower supply were also helpful in providing contributions to the general construction business.

General and administrative expenses for DMCI were higher due mainly to the increased construction activity. Regardless, the Company is still consistent with its cost savings guidance despite expectations that overhead is expected shoot up due to the requirements from the newly awarded contracts.

With the current infrastructure development drive of the country, the Company, thru DMCI, is well positioned to be a driver and a beneficiary of such infrastructure progress.

Steel Fabrication and Assembly

The Company's steel fabrication business is reported thru its 98% owned steel fabrication company, Atlantic Gulf and Pacific Company of Manila, Inc. (AG&P). AG&P is the oldest construction company in the country with countless projects spanning over 100 years.

AG&P reported a humunguous growth of 3.5 times in the first half net contributions from P92 million in 2009 to P330 million in 2010. New projects, namely the BP Whiting – Coker project, accounted for P906 million of period revenues and significantly provided the much needed push in AG&P gross revenues. Overseas manpower services, although slightly lower, continued to contribute significant revenues to AG&P.

Early in 2008, the Company was looking to sell AG&P but due credit crunch suffered in the same year the sale did not materialize. As a result, the Company has decided to financially support AG&P early in 2009 with the hopes to renew and improve its business to become a fully contributing subsidiary and improve its value. As of now, the Company is still selling AG&P and hopefully will conclude the sale by the end of 2010.

Nonetheless, the Company is confident that aside from its current orderbook of mostly oil and gas related offshore contracts, AG&P's competence in steel fabrication can be a strategic auxiliary competence alongside its general contracting capacity, in benefiting from the current infrastructure progress.

REAL ESTATE

The Company's real estate business is led by the Company's wholly owned real estate development subsidiary, DMCI Project Developers, Inc. (PDI). Under the brand name DMCI Homes, PDI develops and sells middle income residential housing units that define best in quality-value for money units.

As a background, the Company recognizes real estate revenues using the full accrual method, where sales are booked when the unit is fully complete and the down payment of 20% is already collected. This method is in accordance with International Accounting Standards but is not the same with most real estate developers in the Philippines. Supposedly there was a move to adopt this in the country sometime in 2008 but was subsequently suspended by the SEC after majority of the real estate companies lobbied against it. Despite this, the full accrual method has been and is still used by the Company.

The housing segment recognized a 24% increase in net contributions for the period from P299 million last year to P764 million this year despite only a 29% increase in realized revenues. Realize housing sales for the period reached P2.4 billion from P1.87 billion last year. Below is a table on the sales and gross margins per project of the housing business:

	1H 2010		1H 2009		VARIANCE	
	SALES	GP%	SALES	GP%	Amount	%
Alta Vista De Boracay	55,220,176	32%	48,231,398	32%	6,988,779	14%

Others	-		37,837,636	-73%	(37,837,636)	-100%
	2,400,242,603	**43%**	**1,867,633,796**	**35%**	**532,608,807**	**29%**

**negative and irregular amounts in sales and gross margins are result of cost/sales adjustments to reflect correct balances*

Significant realized sales from Cypress Towers, Ohana Place, Rosewood Pointe, Royal Palm and Tivoli Gardens all contributed to improved 1st half revenues but it is the higher price that helped boost gross margins improving income.

A better representative of current operations would be sales and reservations for the period which experienced a growth of 92% from P3.6 billion in 2009 to P6.9 billion in 2010. The steep growth can be attributed to the effect of the global credit crunch which greatly affected the Company's housing operations in the 2nd half of 2008 until the 1st half of 2009. Aside from this, current sales and reservation have been at its highest averaging more than P1 billion a month indicating a recovery and even a growing demand in DMCI housing units. Existing projects like Mahogany Place 3, Tivoli Gardens, among others, plus new projects like Cedar Creek (Rosewood 3) and The Redwoods, all provided significant growth in sales and reservations for the first semester of 2010.

Moreover, housing interest income for the period spiked to P437 million, up by 176% from the P158 million recognized last year. This indicates the continuing growth in internally financed buyers despite the better bank financing terms-interest wise.

Operating expenses in the real estate segment were higher by 23% due to:

- Increase in selling and marketing activities such as commissions, sales incentives, marketing tools, ads, etc.
- Increase in local taxes, an offshoot of 2008 increased revenues
- Real estate taxes on unsold and not yet turned over inventory
- Increase in utilities

Note that majority of the Company's housing units have a selling price between P1.5-3 million per unit and as such have been registered with the Board of Investments (BOI) as part of their affordable housing investments that provide income tax holiday. With this the Company's housing segment enjoys income tax holidays for most of its units sold.

MINING & POWER

Coal Mining & Power (Calaca)

The Company's coal mining business and its major power generating asset (Calaca) are both lodged under 55%-owned and publicly listed Semirara Mining Corp (SMC). SMC reported an improvement in first half operating results from a net income of P721 million in 2009 to P2.486 billion in 2010 providing an 245% growth in net contribution of P 424 million to P1.4 billion in 2009 and 2010 respectively. This was mainly due to the inclusion of the new Calaca Power Plant operations aside from the growth in coal deliveries, specifically coal exports.

Below is SMC's management discussion and analysis of results of operations and financial condition for the period ending and as of June 30, 2010 as lifted from its first quarter financial report with the PSE and SEC:

SEMIRARA MINING CORPORATION

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

2010 FIRST HALF OPERATION

The company has expanded its normal mining capacity to 70 million bank cubic meters (bcm) annually with the commissioning of new mining equipment which took place in early this year. With this capacity, it posted total material movement of 40,632,772 bcm breaching its half year current capacity as we took advantage of the good weather condition.

Meanwhile, with a strip ratio of 10.2:1, run-of-mine (ROM) coal produced was 3,706,110 metric tons (MTs), comprised of 2,981,460 MTs of clean coal and 724,650 MTs of washable coal. These yielded to a net product coal of 3,382,088 MTs.

With the intensive mining operation catching up the steadily rising demand for Semirara coal, fueled by aggressive marketing efforts, the company posted a record high coal sales of 3,917,144 MTs for the period. The huge beginning inventory of 763,575 MTs augmented the current period's coal production to be able to reach coal sales at this level and reducing the inventory level to 193,122 MTs and the end of first half.

To sustain the current level of activity, the company intensifies its coal exploratory and confirmatory drillings around the adjacent areas of the current mine and the old mine. Moreover, drilling data further indicate favorable results. Also, support facilities are being put in place in order to level-up with the intensified mining operations.

At the outset, the integration of mining and power generation as a defensive strategy boosted the company business. With this, the Group posted P13.01 billion consolidated revenue for the period. Of this, the mining business shared P7.06 billion while power segment contributed P5.96 billion of sales after elimination of intercompany transactions.

The group's consolidated cost of sales amounted to P8.56 billion, P4.61 relates to cost of coal and P3.95 billion pertains to power generation cost. Thus, posting a gross margin of P4.46 billion of which P2.45 billion came from coal mining and P2.01 billion came from power generation.

Meanwhile, the operating expenses hit the level of P1.67 billion due to interim provision for government share of P1.02 billion, which is still subject to final adjustment after full accounting of the full year cost vis-à-vis coal sales. This is expected to taper off at year end due to expected rise in cost of fuel and cost of issuances of inventories which are still carried in the asset account. These inventories are intended for mine rehabilitation projects and programmed equipment maintenance. Cost is expected to rise in inverse proportion with coal sales. Taxes and licenses of P366.72 million and general administrative expense of P283.45 million were mostly incurred by the power business segment in connection with the finalization of the documentation process re – Calaca Power Plant acquisition.

With the fluctuation of foreign exchange rates the group sustained a net forex gain amounting to P28.70. The financing charges on short-term and long-term loans amounted to P337.60 million while the other income and charges net at P0.6 million. Equity share in net income of associates amounted to P64.22 million. The share in earnings from DMCI Mining Corp. was mitigated by the share in losses of DMCI Power Corp. The latter has just started its commercial operations.

With these, the consolidated net income before tax amounted to P2.55 billion. The Group provided an income tax liability for the power business at P572 thousand only due to and zero for the coal mining *because of the Group's registration with the Board of Investments for ITH incentive, Thus, consolidated Net Income After Tax amounted to P2.55 billion for the first half of the year, P1.26 billion came from the core business coal mining, and P1.29 billion from the power business segment.*

2010 FIRST HALF FINANCIAL CONDITION

As of the first half, the group stood with P25.98 billion total assets showing a 9% growth from the beginning of the year. The increase principally came from impressive coal and power sales, as reflected in the increase in cash generation and accounts receivable. Of the total assets, current assets pose at P7.23 billion which comprises of cash, P1.20 billion, Receivables, P2.67 billion, inventories, P2.51 billion and other assets, P853 million, while the non-current assets sat at P18.75 which accounts for property, plant and equipment of P17.95 billion, and investments of P613.63 million and other non-current assets of P188.68 million. The increase of 148% and 119% in cash and cash equivalents and receivables were mainly driven by increase in volume both from coal and power sales. Similarly, the 19% decrease in inventories was mainly contributed by the decrease in coal inventory as more coal were sold than produced during the current period. While, the 151% increase in investments mainly came from the cash placement in sinking fund by the power segment amounting to P305 Mn.

Meanwhile, total liabilities amounted to P16.45 billion, of this, current liabilities is P5.35 billion consisting of short-term loans, trade payable and due to government agencies. The decrease in current portion of long-term debt was due to the reclassification to long term debt portion of the current portion of PSALM debt after this was refinanced by the group via project financing. While the increase in notes payable were related to bridge loans incurred by the group relative to the full payment of the PSALM debt. The huge increase in Trade and Other Payables is principally due to the interim provision of royalty to the government of P1.02 Bn, the rest of the increase came from purchases of goods and services from consignment parts and for various development projects. The balance of P11.09 billion represents the non-current obligations principally from the project financing loan of P9.6 billion for the power business from local banks with a grace period of one (1) year and deferred payment arrangement for conventional mining equipment from foreign supplier amounting to P1.5 Bn (US$32 Mn).

The group's total shareholder's equity totaled P9.53 billion with a paid-up capital amounting to P5.66 billion. Total paid-up capital decreased by 8% compared to the beginning of the year. This was due to decrease in deposit for future subscription by P2.38 billion, from P5.40 billion at the start of the year to P3.02 at the end of 1H.. After determination of the final SRO share price of P74/share for 59,375,000 shares last 10 June 2010, the company returned the excess deposit beyond the rights entitlement. The final estimated gross proceeds is P4.39 billion from the stock rights offering. The decrease was offset by the Gain on Sale of Treasury Shares which was re-issued last April 2010 amounting to P765 million. The entire 19,302,200 shares held in treasury were all sold. Also, the retained earnings shoot-up to P3.87 after recording the group's net income of P2.55 billion net of P6/share cash dividend as declared last 27 April, 2010 or P1.77 billion which was paid last 23 June 2010.

2010 COMPARATIVE REPORT

I. COAL PRODUCTION / POWER GENERATION

Aligned with the company's expansion program, it has commissioned a number of new mining equipment in early part of the year. This increased the company's excavating and material movement capacity 70 Mn bcm from 60 Mn bcm. As a result, it posted a total of 40.6 million bcm material movement in first half of the year, a 32% increase over last year's 30.7 million bcm. Materials movement in Q1 and Q2 were 19.45 million bcm and 21.18 million bcm respectively or higher by 20% and 46% than last year,

Meanwhile, the company almost doubled its ROM coal production in the first half than same period a year ago as it took advantage of the good weather condition and adequately matched the increasing demand of coal during the current period. The Q1 and Q2 ROM coal extraction were 1.85 Mn MT and

1'86 Mn MT, respectively or higher by 121% and 74%. First half coal production is 85% higher than same period last year.

While the company is continuously aggressive on its coal extraction and coal shipment it was able to manage a safe level of ending inventory of 193.12 thousand MT in the first half.

On the other hand, the power business was able to generate 1,082 GWh during the 1st half of which 617 GWh was generated during the 2nd quarter or 33% higher from the 1st quarter performance. The improvement was realized after some minor repairs activities were done from the date the company took over the operation of the power plant. Plant availability registered at an average of 64% in 1Q to 84% in 2Q or 30% improvement. Thus, power generation in 1Q was lower due to lower availability caused by the interruption in the power plants operation resulting from minor rehabilitation activities. The average capacity in the 1st half was at 163 MW and 171 MW for Unit 1 and Unit 2, respectively or at combined capacity of 334 MW.

II. MARKETING

With the company's aggressive marketing effort coupled with the rising demand for coal, it has accepted the entrant of new customers from the region. Evidently, the company posted a record high 3.92 Mn MT of coal sold for the first half, higher by 81% from last year's shipments on the same period. Of the total coal shipment, 2.01 Mn MT were sold in Q1 and 1.91 Mn MT were sold in Q2.

The export sales during the 1st half remained the biggest part of the pie at 58% posting an impressive increase of 136% from last year's coal shipments of 955 thousand MT to 2.26 Mn MT. Export sales contribution to coal revenue is at 53% in the current period against 30% of 1st half last year

Local sales amounted to 1.66 Mn MT consisting of sales to power plants, cements and other industries of 987 thousand MT, 442 thousand MT and 233 thousand MT, respectively. Relatively, sales to these industries improved from last year by 33%, 41% and 48%, respectively, with aggregate increase in local sales by 34% from last years 1.24 Mn MT. Local power plants, other than the group's own power plant increase their offtake with the commissioning of a new plant. The increase in the offtake of the cement industry was due to the entry of a major player in the cement industry, while the old customers likewise increase their coal requirement similarly with the rest in the other industry group.

After, the company tookover the power plant business, it has modified its pricing scheme for its own power plant from import parity pricing to market base pricing to be comparative with those other power plant customers. As a result, the composite average price has declined by 24% from P2,914/MT level last year. However, with the bubbling coal demand which provided the company a pricing advantage, the Q1 average effective FOB price level of P2,142/MT went up to P2,300/MT in Q2 averaging at P2,219/MT in the first half.

Meanwhile, the group's power sales in 1st half went as high as 998 GWh from 469 GWh in Q1 or 13% higher from Q1 sales. These figures exclude sales from spot purchase being that said sale is cost neutral. These sales represent power sold from power generated by the group's power plant. Out of the total sales, 664 GWh was for TSCs and 332 GWh was sold to the spot market. Total revenue contributed by the power business was at 46% to the group's gross revenue inclusive of spot purchase. The average price per KWh registered at P4.75 at the end of 1st half.

III. FINANCE

A. Sales and Profitability

Strong demand for coal motivated by the aggressive marketing efforts spurs SMC coal shipments to shoot-up to 3.92 Mn MT posting P8.67 billion in coal revenue. On the other hand, the power sales poured-in P5.96 billion sales. After elimination, the Group's consolidated revenue totaled P13.015 billion showing a growth of 106% over H1 2009.

Inversely, the cost of coal sold shows a 2% decrease from P6.36 to P6.26 Bn as of end of the period Benefiting from economies of scale. The decline in cost is attributable to the better stripping ratio of 10.25:1 compared to last year of 15.00:1 and with the intensified mining activities which allowed the maximization of the mining equipment capacities. In addition, the Power business incurred P3.95 Bn power generation cost. The consolidated cost of sales amounted to P8.56 Bn, resulting to a gross profit of P4.46 Bn or almost tripled the P1.517 billion gross profit margin in H1 2009. This demonstrates a 10% increase in gross profit in every peso sales, from 24% last year same period to 34% as of end of the current period.

The Group's operating expenses hit to P1.67 Bn of which P1.19 Bn was incurred by coal mining, higher by 123% than H1 2009 and the P479 Mn was incurred by the power business.

As a consequence of the movement of foreign exchange rates, the group has sustained a P28.71 million foreign exchange gain. Also, the Company has incurred Finance Cost amounting to P337.60 million and incurred other expenses amounting to P633 thousand.

Meanwhile, the Group realized an additional income from its share in earnings of associates amounting to P64.21 million to further augment Net Income Before Tax to P2.55 billion.

With the approval of the Power Plant's BOI registration, the Group is now enjoying income tax incentive., The provision for income tax amounted to P572 thousand by the power business, thus the company posted a record high Net Income After Tax of P2.55 billion which 3x of the full year NIAT last year. Consolidated earnings per share is at P8.90.based on weighted average outstanding shares as of June 30, 2010 of 286,530,727 shares after the re-issuance of treasury shares last April 8, 2010.

B. Financial Condition, Solvency and Liquidity

Total assets stood at P25.98 billion of which current assets amounted to P7.23 billion while the rest are non-current. In conjunction, liabilities totaled P11.09 billion, of this amount P5.35 billion are current obligation and rest are non-current resulting to current ratio of 1.35:1 and 7% Net working capital ratio. These evidently demonstrate the company's strong financial condition.

Meanwhile, the operations provided a net the Net Cash of P3.83 billion for the first semester showing an increase of 32%. This was mainly due to the high inflow from earnings, increase in liability and decrease in inventory offset by increases in receivables and other current assets. Moreover, current year's Cash utilization for its investing activities amounted to P1.61 billion, majority were spent for the acquisition of new equipment for this year's expansion.

On the other hand, Net Cash Used in Financing Activities amounted only to P1.5 billion. Although borrowing exceeds the loan servicing by P1.36 billion, and ample cash was generated from the sale of treasury shares, most of the cash were used to pay cash dividend amounting to P1.78 Bn and return of the excess deposit for future stock subscription beyond the minimum rights entitlement amounting to P2.39 Bn.

In summary, the Group has generated a Net Cash of P715 million or 148% from the beginning balance of P482 million resulting to P1.2 billion cash balance at the end of 1st half. With this cash level, the cash ratio has increased by 12% from the start of the year of 8% indicating the strengthening of the Group's cash position.

IV. PERFORMANCE INDICATORS:

1. ***Earnings per Share*** *– The earnings per share shoot up to P8.90 a piece with the combined net income from the coal and power segments. This is more than three folds of the EPS posted in the 1st half last year. This indicated a very promising growth to the group as the power business is providing more value to the core business, coal mining.*

2. ***Debt-to-Equity Ratio*** *– The Group's consolidated Debt-to-Equity Ratio stood at 1.75x with the availment of project finance loan to finance the acquisition of the Power Plant. , the management is however positive that this deterioration in the ratio is just temporary. Despite the fact that the Power Plant is still to undergo major rehabilitation works, it is already contributing positively to the Company's H1 results.*

3. ***Business Expansion*** *– The Company continuously aims for growth and development. In order to achieve this, operations must take each opportunity to expand. The aggressive capacity expansion program launched by the Company is a well calculated risk that offers promising improvement of total stakeholders' value especially with the acquisition of a coal fired power plant which is a forward integration of the core business of coal mining.*

4. ***Expanded Market*** *– The growing sales of Semirara coal over the past few years is a clear testament to the success of the Company's marketing efforts. The expansion of its markets, especially to the export markets, drive the Company's sustainable growth.*

5. ***Improved coal quality*** *– One of the biggest challenges that the Company is confronted with is to successfully market coal that is naturally of lower quality. However, with its persistent efforts to maximize the quality of its product, overcoming inherent limitations, Semirara coal ultimately became acceptable to a wide range of coal users. Moreover, it continues to find innovative ways to further improve and maximize coal quality.*

Nickel

The Company's venture into nickel mining was revived in 2010 when a mining contract with Benguet Mining was finalized early this year. DMCI Mining, Corp., the Company's nickel and non-coal based mining company, set out to mine and market relatively high concentration nickel ore (1.8%-2% nickel content) at the Benguet nickel mine in Santa Cruz, Zambales. This has proved a good venture as first half operations led to a P162 million net income with contributions amounting P128 million this year to the Company compared to P22 million loss for a negative contribution of P17 million last year. DMCI Mining was able to mine and sell 594 thousand wet metric tons (WMT) of Nickel for period, up by 4.6 times from the 106 thousand WMT sold last year.

Evident of the Company's competence in mining and having the only reliable port at the area, DMCI Mining has quickly taken the opportunity to mine and sell nickel and once again prove resilient and opportunistic to the nickel commodities market cycles.

II. FINANCIAL CONDITION

Audited2009 – 1H2010

(In Php Millions)			audited		Variance	
	1H 2010	**%**	**2009**	**%**	**Amount**	**%**
Cash and cash equivalents	6,312	10%	3,262	6%	3,050	93%
Receivables - net	8,080	13%	5,404	9%	2,676	50%
Inventories - net	10,548	17%	10,660	18%	(113)	-1%
Noncurrent receivables - net	1,724	3%	2,196	4%	(472)	-21%
Investments in associates	7,613	12%	6,786	12%	827	12%
Investment properties - net	3,560	6%	2,578	4%	981	38%
Property, Plant and Equipment - net	22,248	35%	21,970	38%	278	1%
Bank Loans	360	1%	1,207	2%	(847)	-70%
Accounts and other payables	10,700	17%	8,141	14%	2,558	31%
Current portion of long-term debt	1,097	2%	3,840	7%	(2,743)	-71%
Customers' deposits	3,451	5%	4,096	7%	(645)	-16%
Long-Term Debt - net of current portion	16,918	27%	14,284	25%	2,634	18%
Total Noncurrent Liabilities	17,801	28%	15,614	27%	2,187	14%

The Company's financial condition for the period improved as net assets slightly increased by 11%.

Cash growth is derived mainly from the operations of the different business with the increase significantly from the full operations of the power generation business.

Total receivables (current and non-current) went up by 29% due mainly to revenue activities in all businesses mainly construction and real estate, with the significant growth coming from the inclusion of the power sector.

Consolidated inventories reported a marginal 1% decrease as coal deliveries were more than coal production for the period and significantly affected inventory increases of the other businesses.

Investments were up as a result of the Company's share in net operations of the water business and other unconsolidated equity investments.

Investment properties significantly increased by 38% due to new property acquisitions at the real estate business that are yet to be classified as inventory. Once development plans have been finalized, these properties will be reclassified into real estate inventory.

Property plant & equipment remained at the same levels.

Accounts & other payables increased as a result of working capital requirements, trade operations, deferred revenues and accruals more evident in the current boom seen in the construction sector. Most of these trade payables are payables to suppliers.

Customer's deposits were reduced by 16% as these accounts were realized for the period.

Long term debt increased as no credit facilities were incurred at the coal mining level to finance equipment purchases to increase coal production capacity.

Liquidity was slightly better as current ratio went up from 1.26 to 1.56. Debt to equity ratio improved to 1.21 from 1.46 as operating results for the period improved ownership values.

III. KEY PERFORMANCE INDICATORS

The Company and its Subsidiaries (the "Group") has the following as its key performance indicators:

a) Segment Revenues
b) Segment Net Income (after Minority)
c) Earnings Per Share
d) Current Ratio
e) Debt to Equity Ratio

SEGMENT REVENUES

(In Php Millions)	**2010**		**2009**		**Variance**	
	1H	**%**	**1H**	**%**	**Amount**	**%**
REVENUE						
General Construction	5,789	24%	2,624	22%	3,165	121%
Steel Fabrication	1,538	7%	1,014	8%	524	52%
CONSTRUCTION	**7,327**	**31%**	**3,638**	**30%**	**3,689**	**101%**
Coal Mining	7,058	30%	6,356	53%	702	11%
Nickel Ore Mining	823	3%	72	1%	751	1042%
MINING	**7,881**	**33%**	**6,428**	**53%**	**1,453**	**23%**
REAL ESTATE	**2,400**	**10%**	**1,868**	**16%**	**533**	**29%**
ELECTRICITY	**5,957**	**25%**	**-**	**0%**	**5,957**	
PARENT & OTHERS	**72**	**0%**	**84**	**1%**	**(12)**	**-14%**
	23,637	**100%**	**12,017**	**100%**	**11,619**	**97%**

The initial indicator of the Company's gross business results are seen in the movements in the different business segment revenues. As illustrated above the significant main drivers for revenue growth are the power and construction sectors (*see Part I. Results of Operations – different segments for a detailed discussion per business)*.

SEGMENT NET INCOME

(In Php Millions)	2010		2009		Variance	
	1H	%	1H	%	Amount	%
NET INCOME (After Minority)						
DMCI-General Construction	616	15%	234	11%	382	164%
AG&P-Steel Fabrication	330	8%	92	4%	237	257%
CONSTRUCTION	**945**	**23%**	**326**	**15%**	**620**	**190%**
Coal Mining	702	17%	424	20%	278	65%
Nickel Ore Mining	129	3%	(17)	-1%	146	-843%
MINING	**830**	**20%**	**407**	**19%**	**423**	**104%**
REAL ESTATE	**764**	**18%**	**299**	**14%**	**465**	**155%**
ELECTRICITY	**735**	**18%**	**-**	**0%**	**735**	
WATER	**906**	**22%**	**1,121**	**52%**	**(215)**	**-19%**

	4,181	**100%**	**2,157**	**100%**	**2,024**	**94%**

The net contributions (net income after minority) or bottom line results from operations of the Company's businesses can be seen with the increment in net income for the period compared to the same period of the previous year/s for the different business segments. The current period indicates a strong growth driven by all the businesses of the Company along with the recognition of the full operations of the Calaca power plant.

EARNINGS PER SHARE

EARNINGS PER SHARE	**Net Income (millions PhP)**	**EPS (Php/share)**	**Net Income (millions PhP)**	**EPS (Php/share)**
General Construction	616	**0.232**	234	**0.088**
Steel Fabrication	330	**0.124**	92	**0.035**
CONSTRUCTION	945	**0.356**	326	**0.123**
Coal Mining	702	**0.264**	424	**0.160**
Nickel Ore Mining	129	**0.048**	(17)	**(0.007)**
MINING	830	**0.313**	407	**0.153**
REAL ESTATE	764	**0.288**	299	**0.113**
ELECTRICITY	735	**0.277**	-	**-**
WATER	906	**0.341**	1,121	**0.422**
PARENT & OTHERS	0	**0.000**	4	**0.001**
TOTAL	4,181	**1.574**	2,157	**0.812**

The Company's consolidated earnings per share for the period was P1.57/share accounting for a 94% increase over P0.81/share of the same period last year. Only the water business didn't provide the growth in earnings as an effect of extraordinary items booked in the previous year (*see Part I. Results of Operations – different segments for a detailed discussion per business)*.

CURRENT RATIO

Liquidity is an essential character of any organization, and the Company, including the Group as a whole, should indicate acceptable levels of liquidity. The initial test of liquidity is the current ratio, which will display a company's ability to satisfy current obligations with current resources. Current ratio is arrived by dividing the current assets over the current liabilities. The Company uses this test and compares it with industry balances to determine its ability to satisfy current obligations with respect to its competitors (*see Part II. Financial Condition for a detailed discussion*).

DEBT TO EQUITY RATIO

As a stockholder/investor, financial position and stability would be an important aspect. The Company tests its financial position through the debt to equity ratio. This test indicates the Company's ownership of creditors vs. owners/investors. In addition, debt to equity ratio maintenance is a requirement set by creditors as a standard for extending credit. Debt to equity ratio is computed by dividing the total liabilities over total stockholders equity (*see Part II. Financial Condition for a detailed discussion*).

PART II--OTHER INFORMATION

1. This interim financial report is in compliance with generally accepted accounting principles;
2. The same accounting policies and methods of computation are followed in the interim financial statements as compared with the most recent annual financial statements;
3. The company's operation is a continuous process. It is not dependent on any cycle or season;
4. A cash dividend was declared at the amount of Php 0.50 per common share paid on July 15, 2010 to the holders of record of June 22, 2010.
5. There were no subsequent events that have not been reflected in the financial statements for the period that the company have knowledge of;
6. There are no contingent accounts in the balance sheet of the corporation;
7. Except for interest payments on loans, which the Company can fully service, the only commitment that would have a material impact on liquidity are construction guarantees. These are usually required from contractors in case of any damage / destruction to a completed project.
8. Any known trends or any known demands, commitments, events or uncertainties that will result in or that will have a material impact on the registrant's liquidity. **- NONE**
9. The Company recognizes that the continuing slump in the property sector would keep both real estate sales and construction revenues moderate. Nonetheless, the Group's venture into middle-income housing development is expected to significantly contribute to revenues and income.

DMCI HOLDINGS, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Corporate Information

DMCI Holdings, Inc. (the Parent Company) was incorporated and is domiciled in the Philippines. The Parent Company's registered office address and principal place of business is at 3rd Floor, Dacon Building, 2281 Don Chino Roces Avenue, Makati City.

The Parent Company is the holding company of the DMCI Group (collectively referred to herein as the Group) which is primarily engaged in general construction, mining, power generation, infrastructure, real estate development and manufacturing. The Parent Company is a subsidiary of Dacon Corporation (Dacon) which is also the ultimate parent Company.

2. Summary of Significant Accounting Policies

Basis of Preparation
The consolidated financial statements of the Group have been prepared using the historical cost basis, except for available-for-sale (AFS) financial assets that have been measured at fair value. The Group's functional and presentation currency is the Philippine Peso (₱). All amounts are rounded to the nearest thousand (₱000) unless otherwise indicated.

Statement of Compliance
The consolidated financial statements of the Group have been prepared in compliance with Philippine Financial Reporting Standards (PFRS).

Basis of Consolidation
The consolidated financial statements comprise the financial statements of the Group as of December 31, 2009 and 2008 and for each of the three years in the period ended December 31, 2009. Under PFRS, it is acceptable to use, for consolidation purposes, the financial statements of subsidiaries for fiscal periods differing from that of the Parent Company if the difference is not more than three months.

The consolidated financial statements are prepared using uniform accounting policies for like transactions and other events in similar circumstances. All significant intercompany balances and transactions, including income, expenses and dividends, are eliminated in full. Profits and losses resulting from intercompany transactions that are recognized in assets are eliminated in full.

Subsidiaries are fully consolidated from the date of acquisition, being the date on which the Group obtains control, and continue to be consolidated until the date that such control ceases.

Minority interests represent the portion of profit or loss and net assets in subsidiaries not wholly owned by the Group and are presented separately in consolidated statement of income and consolidated statement of changes in equity and within equity in the consolidated statement of financial position, separately from equity holders' of the Parent Company. Losses are attributed to the non-controlling interest even if that results in a deficit balance.

The consolidated financial statements include the financial statements of the Parent Company and the following subsidiaries (which are all incorporated in the Philippines):

	Effective Percentages of Ownership

[1] Also engaged in real estate development

[2] DMCI's subsidiaries

[3] PDI's subsidiaries

[4] AG&P's subsidiaries

[5] Semirara's subsidiary

DMCI-PDI Hotels, Inc. (PDI Hotels)

On September 2, 2009, PDI Hotels was incorporated to engage in hotel business, including but not limited to the ownership of, establishment, maintenance and operation of hotels, condotels, apartelles, and similar establishments, as well as to engage in the development of, design, and implementation of hotel management systems or manual of operations. PDI Hotels started commercial operations on November 1, 2009.

DMCI Project Developers, Inc. (PDI)
In 2008, DMCI and PDI entered into a debt-to-equity conversion agreement for the equivalent 32.19% interest in PDI.

DMCI Power Corporation (DPC)
On February 28, 2008, the BOD of DPC approved the increase in the authorized capital stock of DPC from ₱80.00 million divided into 80 million shares, par value of ₱1.00 per share, to ₱1,000.00 million divided into 1,000 million shares, par value of ₱1.00 per share.

In 2007, the Parent Company holds the entire ₱20 million outstanding capital stocks of DPC. In relation to the increase in the capital stocks of DPC, the BOD of the Parent Company, in its meeting on February 28, 2008, approved the subscription to an additional 105 million shares at par value of ₱1.00 per share in DPC. Semirara subscribed to the increase in the authorized capital stocks of DPC and infused a total of ₱125.00 million which resulted in a 50:50 equity sharing of the Parent Company with Semirara.

On March 12, 2009, the Semirara made an additional subscription to the unissued capital stock of DPC equivalent to 25 million shares at ₱1.00 per share or a total subscription price of
₱25.00 million payable in cash. Advances for future subscriptions amounting to ₱60.55 million were also made.

DMCI Mining Corporation (DMC)
On February 28, 2008, the BOD of DMC also approved the increase in the authorized capital stock of DMC from ₱80.00 million divided into 80 million shares, par value of ₱1.00 per share, to
₱500.00 million divided into 500 million shares, par value of ₱1.00 per share.

In 2007, the Parent Company holds the entire ₱20 million outstanding capital stocks of DMC. In relation to the increase in the capital stocks of DMC, the BOD of the Parent Company, in its meeting on February 28, 2008, approved the subscription to an additional 80 million shares at par value of ₱1.00 per share in DMC. Semirara subscribed to the increase in the authorized capital stocks of DMC and infused a total of ₱100.00 million in DMC which resulted in a 50:50 equity sharing of the Parent Company with Semirara.

At the end of second quarter of 2009, DMC implemented a complete suspension of operations of its nickel and ore mining activities in Sta. Cruz, Zambales.

On October 7, 2009, Benguet Corp. has signed a mining contractorship and off-take agreement with DMC covering a portion of Benguet's 1,406-hectare Sta. Cruz nickel project located in
Sta. Cruz, Zambales. The agreement allows DMC to explore, develop, mine and sell up to 200,000 metric tons of two percent high grade nickel ore for a period of three (3) years. All cost and related expenses for the exploration, development and mining of the above mentioned areas shall be for the sole account of DMC. All profits accruing from this Agreement, after deducting the costs and expenses connected with the production of the product, and over and above payment of all taxes and royalty, shall be divided equally between them.

Sem-Calaca Power Corporation (SCPC)
SCPC, a wholly-owned subsidiary of Semirara, was incorporated on November 19, 2009, primarily to acquire, expand and maintain power generating plants, develop fuel for generation of electricity, and sell electricity to any person or entity through electricity markets, among others.

Changes in Accounting Policies
The accounting policies adopted in the preparation of the consolidated financial statements are consistent with those of the previous financial year except for the following new and amended PFRS and Philippine Interpretations from International Financial Reporting Interpretations Committee (IFRIC) which were adopted as of January 1, 2009.

New Standards and Interpretations
- Philippine Accounting Standard (PAS) 1 (Revised), *Presentation of Financial Statements* (effective January 1, 2009)
- PAS 23 (Revised), *Borrowing Costs* (effective January 1, 2009)
- PFRS 8, *Operating Segments* (effective January 1, 2009)
- Philippine Interpretation IFRIC 13, *Customer Loyalty Programmes* (effective July 1, 2008)
- Philippine Interpretation IFRIC 16, *Hedges of a Net Investment in a Foreign Operation* (effective October 1, 2008)
- Philippine Interpretation IFRIC 18, *Transfers of Assets from Customers* (effective July 1, 2009)

Amendments to Standards
- PAS 32 and PAS 1 Amendments, *Puttable Financial Instruments and Obligations Arising on Liquidation* (effective January 1, 2009)
- PFRS 1 and PAS 27 Amendments, *Cost of an Investment in a Subsidiary, Jointly Controlled Entity or Associate* (effective January 1, 2009)
- PFRS 2, Amendment, *Vesting Conditions and Cancellations* (effective January 1, 2009)
- PFRS 7 Amendment, *Improving Disclosures about Financial Instruments* (effective January 1, 2009)
- Philippine Interpretation IFRIC 9 and PAS 39 Amendments, *Embedded Derivatives* (effective June 30, 2009)

Improvements to PFRSs 2008
- PFRS 5, *Non-current Assets Held for Sale and Discontinued Operations*
- PAS 1, *Presentation of Financial Statements*
- PAS 16, *Property, Plant and Equipment*
- PAS 18, *Revenue*
- PAS 19, *Employee Benefits*
- PAS 23, *Borrowing Costs*
- PAS 28, *Investment in Associates*
- PAS 31, *Interest in Joint ventures*
- PAS 36, *Impairment of Assets*
- PAS 38, *Intangible Assets*
- PAS 39, *Financial Instruments: Recognition and Measurement*
- PAS 40, *Investment Properties*

Standards or interpretations that have been adopted and that are deemed to have an impact on the consolidated financial statements or performance of the Group are described below:

- PAS 1 (Revised), *Presentation of Financial Statements*
  The revised standard introduces a new statement of comprehensive income that combines all items of income and expenses recognized in the profit or loss together with "comprehensive income". Entities may choose to present all items in one statement, or to present two linked statements, a separate statement of income and a statement of comprehensive income. This

  standard also requires additional requirements in the presentation of statements of financial information and owners' equity as well as additional disclosures to be included in the financial statements. The Group has elected to present two linked statements, a consolidated statement of income and a consolidated statement of comprehensive income. The consolidated financial statements have been prepared following the revised disclosure requirements.

- PAS 23 (Revised), *Borrowing Costs*
  The revised PAS 23 requires capitalization of borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset. The Group's previous policy was to expense borrowing costs as they were incurred. In accordance with the transitional provisions of the amended PAS 23, the Group has adopted the standard on a prospective basis. Therefore, borrowing costs will be capitalized on qualifying assets with a prevailing commencement date on or after January 1, 2009. During the 12-month period to December 31, 2009, ₱45.03 million of borrowing costs have been capitalized on qualifying assets included in "Real Estate Held for Sale and Development" account in the consolidated statement of financial position.

- PFRS 8, *Operating Segments*
  PFRS 8 replaced PAS 14, *Segment Reporting*, upon its effective date. The Group concluded that the operating segments determined in accordance with PFRS 8 are the same as the business segments previously identified under PAS 14. PFRS 8 disclosures are shown in Note 33, including the related revised comparative information.

- Amendment to PFRS 7, *Financial Instruments: Disclosure*
  The amendments to PFRS 7, *Financial Instruments: Disclosures*, require additional disclosures about fair value measurement and liquidity risk. Fair value measurements related to items recorded at fair value are to be disclosed by source of inputs using a three level fair value hierarchy, by class, for all financial instruments recognized at fair value. In addition, a reconciliation between the beginning and ending balance for level 3 fair value measurements is now required, as well as significant transfers between levels in the fair value hierarchy. The amendments also clarify the requirements for liquidity risk disclosures with respect to derivative transactions and financial assets used for liquidity management. The fair value measurement disclosures are presented in Note 34. The liquidity risk disclosures are not significantly impacted by the amendments and are presented in Note 34.

- PFRS 1 and PAS 27 Amendments - *Cost of an Investment in a Subsidiary, Jointly Controlled Entity or Associate*
  The amendments to PFRS 1, *First-time Adoption of Philippine Financial Reporting Standards*, allowed an entity to determine the 'cost' of investments in subsidiaries, jointly controlled entities or associates in its opening PFRS financial statements in accordance with PAS 27, *Consolidated and Separate Financial Statements*, or using a deemed cost method. The amendment to PAS 27 required all dividends from a subsidiary, jointly controlled entity or associate to be recognized in the income statement in the separate financial statement. The revision to PAS 27 was applied prospectively. The new requirement affects only the Parent Company's separate financial statement and does not have an impact on the consolidated financial statements.

- PAS 18, *Revenue*
  The amendment adds guidance (which accompanies the standard) to determine whether an entity is acting as a principal or as an agent. The features to consider are whether the entity:

  - Has primary responsibility for providing the goods or service
  - Has inventory risk
  - Has discretion in establishing prices
  - Bears the credit risk

  The Group has assessed its revenue arrangements against these criteria and has concluded that it is acting as principal in all arrangements. The revenue recognition policy has been updated accordingly.

Future Changes in Accounting Policies
The Group has not applied the following PFRS and Philippine Interpretations which are not yet effective as of December 31, 2009:

- PFRS 3, *Business Combinations* (Revised) and PAS 27, *Consolidated and Separate Financial Statements* (Amended)
  The revised standards are effective for annual periods beginning on or after July 1, 2009. PFRS 3 (Revised) introduces significant changes in the accounting for business combinations occurring after this date. Changes affect the valuation of non-controlling interest, the accounting for transaction costs, the initial recognition and subsequent measurement of a contingent consideration and business combinations achieved in stages. These changes will impact the amount of goodwill recognized, the reported results in the period that an acquisition occurs and future reported results. PAS 27 (Amended) requires that a change in the ownership interest of a subsidiary (without loss of control) is accounted for as a transaction with owners in their capacity as owners. Therefore, such transactions will no longer give rise to goodwill, nor will it give rise to a gain or loss. Furthermore, the amended standard changes the accounting for losses incurred by the subsidiary as well as the loss of control of a subsidiary. The changes by PFRS 3 (Revised) and PAS 27 (Amended) will affect future acquisitions or loss of control of subsidiaries and transactions with non-controlling interests. PFRS 3 (Revised) will be applied prospectively while PAS 27 (Amended) will be applied retrospectively with a few exceptions.

- Philippine Interpretation IFRIC 15, *Agreement for Construction of Real Estate*
  This Interpretation, effective for annual periods beginning on or after January 1, 2012,

covers accounting for revenue and associated expenses by entities that undertake the construction of real estate directly or through subcontractors. The Interpretation requires that revenue on construction of real estate be recognized only upon completion, except when such contract qualifies as construction contract to be accounted for under PAS 11, *Construction Contracts*, or involves rendering of services in which case revenue is recognized based on stage of completion. Contracts involving provision of services with the construction materials and where the risks and reward of ownership are transferred to the buyer on a continuous basis will also be accounted for based on stage of completion. This standard will not have an impact on the consolidated financial statements because the Group accounts its revenue using completed contract method.

- Philippine Interpretation IFRIC 17, *Distributions of Non-Cash Assets to Owners*
  This Interpretation is effective for annual periods beginning on or after July 1, 2009 with early application permitted. It provides guidance on how to account for non-cash distributions to owners. The Interpretation clarifies when to recognize a liability, how to measure it and the associated assets, and when to derecognize the asset and liability. The Group does not expect the Interpretation to have an impact on the consolidated financial statements as the Group has not made non-cash distributions to shareholders in the past.

Amendments to Standards

- PAS 39 Amendment - *Eligible Hedged Items*
  The amendment to PAS 39, *Financial Instruments: Recognition and Measurement,* effective for annual periods beginning on or after July 1, 2009, clarifies that an entity is permitted to designate a portion of the fair value changes or cash flow variability of a financial instrument as a hedged item. This also covers the designation of inflation as a hedged risk or portion in particular situations. The Group has concluded that the amendment will have no impact on the financial position or performance of the Group, as the Group has not entered into any such hedges.

- PFRS 2 Amendments - *Group Cash-settled Share-based Payment Transactions*
  The amendments to PFRS 2, *Share-based Payments*, effective for annual periods beginning on or after January 1, 2010, clarify the scope and the accounting for group cash-settled share-based payment transactions. The Group has concluded that the amendment will have no impact on the financial position or performance of the Group as the Group has not entered into any such share-based payment transactions.

Improvements to PFRS 2009
The omnibus amendments to PFRSs issued in 2009 were issued primarily with a view to removing inconsistencies and clarifying wording. The amendments are effective for annual periods financial years January 1, 2010 except otherwise stated. The Group has not yet adopted the following amendments and anticipates that these changes will have no material effect on the financial statements.

- PFRS 2, *Share-based Payment*: clarifies that the contribution of a business on formation of a joint venture and combinations under common control are not within the scope of PFRS 2 even though they are out of scope of PFRS 3, *Business Combinations* (Revised). The amendment is effective for financial years on or after July 1, 2009.

- PFRS 5, *Non-current Assets Held for Sale and Discontinued Operations*: clarifies that the disclosures required in respect of non-current assets and disposal groups classified as held for sale or discontinued operations are only those set out in PFRS 5. The disclosure requirements of other PFRSs only apply if specifically required for such non-current assets or discontinued operations.

- PFRS 8, *Operating Segment Information*: clarifies that segment assets and liabilities need only be reported when those assets and liabilities are included in measures that are used by the chief operating decision maker.

- PAS 1, *Presentation of Financial Statements*: clarifies that the terms of a liability that could result, at anytime, in its settlement by the issuance of equity instruments at the option of the counterparty do not affect its classification.

- PAS 7, *Statement of Cash Flows*: explicitly states that only expenditure that results in a recognized asset can be classified as a cash flow from investing activities.

- PAS 17, *Leases*: removes the specific guidance on classifying land as a lease. Prior to the amendment, leases of land were classified as operating leases. The amendment now requires that leases of land are classified as either 'finance' or 'operating' in accordance with the general principles of PAS 17. The amendments will be applied retrospectively.

- PAS 36, *Impairment of Assets*: clarifies that the largest unit permitted for allocating goodwill, acquired in a business combination, is the operating segment as defined in PFRS 8 before aggregation for reporting purposes.

- PAS 38, *Intangible Assets*: clarifies that if an intangible asset acquired in a business combination is identifiable only with another intangible asset, the acquirer may recognize the group of intangible assets as a single asset provided the individual assets have similar useful lives. Also clarifies that the valuation techniques presented for determining the fair value of intangible assets acquired in a business combination that are not traded in active markets are only examples and are not restrictive on the methods that can be used.

- PAS 39, *Financial Instruments: Recognition and Measurement*: clarifies the following:
  a) that a prepayment option is considered closely related to the host contract when the exercise price of a prepayment option reimburses the lender up to the approximate present value of lost interest for the remaining term of the host contract.
  b) that the scope ex scope exemption for contracts between an acquirer and a vendor in a business combination to buy or sell an acquiree at a future date applies only to binding forward contracts, and not the derivative contracts where further actions by either party are still to be taken.
  c) that that gains or losses on cash flow hedges o f a forecast transaction that subsequently results in the recognition of a financial instrument or on cash flow hedges of recognized financial instruments should be reclassified in the period that the hedged forecast cash flows affect profit or loss.

- Philippine Interpretation IFRIC 9, *Reassessment of Embedded Derivatives*: clarifies that it does not apply to possible reassessment at the date of acquisition, to embedded derivatives in contracts acquired in a business combination between entities or businesses under common control or the formation of joint venture.

- Philippine Interpretation IFRIC 16, *Hedge of a Net Investment in a Foreign Operation*: states that, in a hedge of a net investment in a foreign operation, qualifying hedging instruments may be held by any entity or entities within the group, including the foreign operation itself, as long as the designation, documentation and effectiveness requirements of PAS 39 that relate to a net investment hedge are satisfied.

Cash and Cash Equivalents

Cash includes cash on hand and in banks. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash with original maturities of three months or less and that are subject to an insignificant risk of changes in value.

Financial Instruments

Date of recognition

The Group recognizes a financial asset or a financial liability in the consolidated statement of financial position when it becomes a party to the contractual provisions of the instrument. Purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace are recognized on the settlement date.

Initial recognition of financial instruments

All financial assets are initially recognized at fair value. Except for financial assets at fair value through profit or loss (FVPL), the initial measurement of financial assets includes transaction costs. The Group classifies its financial assets in the following categories: financial assets at FVPL, held-to-maturity (HTM) investments, AFS financial assets, and loans and receivables. The Group classifies its financial liabilities as financial liabilities at FVPL and other financial liabilities at amortized cost. The classification depends on the purpose for which the investments were acquired and whether these are quoted in an active market. Management determines the classification of its investments at initial recognition and, where allowed and appropriate, re-evaluates such designation at every reporting date.

Financial instruments are classified as liabilities or equity in accordance with the substance of the contractual arrangement. Interest, dividends, gains and losses relating to a financial instrument or a component that is a financial liability, are reported as expense or income. Distributions to holders of financial instruments classified as equity are charged directly to equity net of any related income tax benefits.

As of December 31, 2009 and 2008, the Group's financial instruments are classified as AFS financial assets, loans and receivables and other financial liabilities.

Determination of fair value

The fair value for financial instruments traded in active markets at the reporting date is based on its quoted market price or dealer price quotations (bid price for long positions and ask price for short positions), without any deduction for transaction costs. When current bid and asking prices are not available, the price of the most recent transaction provides evidence of the current fair value as long as there has not been a significant change in economic circumstances since the time of the transaction.

For all other financial instruments not listed in an active market, the fair value is determined by using appropriate valuation methodologies. Valuation methodologies include net present value techniques, comparison to similar instruments for which market observable prices exist, option pricing models, and other relevant valuation models.

Day 1 difference
Where the transaction price in a non-active market is different to the fair value from other observable current market transactions in the same instrument or based on a valuation technique whose variables include only data from observable market, the Group recognizes the difference between the transaction price and fair value (a Day 1 difference) in the consolidated statement of income unless it qualifies for recognition as some other type of asset or liability. In cases where the valuation technique used is made of data which is not observable, the difference between the transaction price and model value is only recognized in the consolidated statement of income when the inputs become observable or when the instrument is derecognized. For each transaction, the Group determines the appropriate method of recognizing the 'Day 1' difference amount.

Loans and receivables
Loans and receivables are financial assets with fixed or determinable payments and fixed maturities that are not quoted in an active market. These are not entered into with the intention of immediate or short-term resale and are not designated as financial assets at FVPL or AFS financial assets. These are included in current assets if maturity is within 12 months from the reporting date; otherwise, these are classified as noncurrent assets. This accounting policy relates to the consolidated statement of financial position captions "Cash and cash equivalents",

"Receivables", "Noncurrent receivables" and Security deposits included under "Other noncurrent assets".

After initial measurement, loans and receivables are subsequently measured at amortized cost using the effective interest rate method, less allowance for impairment. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees that are an integral part of the effective interest rate and transaction costs. The amortization is included in "Finance income" in the consolidated statement of income.

AFS financial assets
AFS financial assets are those non-derivative financial assets that are designated as AFS financial assets or are not classified in any of the three preceding categories. After initial measurement, AFS financial assets are measured at fair value with unrealized gains or losses being recognized in the consolidated statement of comprehensive income and are reported as "net unrealized gain on AFS financial assets" in equity. When the investment is disposed of, the cumulative gain or loss previously recorded in equity is recognized in the consolidated statement of income. Interest earned or paid on the investments is reported as interest income or expense using the effective interest rate. Dividends earned on investments are recognized in the consolidated statement of income when the right to receive has been established. The Group's AFS financial assets pertain to quoted and unquoted securities (see Note 5).

When the fair value of AFS assets cannot be measured reliably because of lack of reliable estimates of future cash flows and discount rates necessary to calculate the fair values of unquoted equity instruments, then instruments are carried at cost less any allowance for impairment losses.

Other financial liabilities
Other financial liabilities include interest bearing loans and borrowings. All loans and borrowings are initially recognized at the fair value of the consideration received less directly attributable transaction costs.

After initial recognition, short-term and long-term debts are subsequently measured at amortized cost using the effective interest method.

Other financial liabilities relate to the consolidated statement of financial position captions, ”Accounts and other payables”, Liabilities for purchased land”, “Payable to related parties”, “Bank loans”, “Long-term debt - including current portion” and “Other noncurrent liabilities”.

Gains and losses are recognized under the “Other income” and “Other expense” accounts in the consolidated statement of income when the liabilities are derecognized or impaired, as well as through the amortization process.

Impairment of Financial Assets

The Group assesses at each reporting date whether there is objective evidence that a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset (an incurred ‘loss event’) and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated. Evidence of impairment may include indications that the borrower or a group of borrowers is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganization and where observable data indicate that there is measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

Loans and receivables

For loans and receivables carried at amortized cost, the Group first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, or collectively for financial assets that are not individually significant. If the Group determines that no objective evidence of impairment exists for individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses for impairment. Those characteristics are relevant to the estimation of future cash flows for groups of such assets by being indicative of the debtors’ ability to pay all amounts due according to the contractual terms of the assets being evaluated. Assets that are individually assessed for impairment and for which an impairment loss is, or continues to be, recognized are not included in a collective assessment for impairment.

If there is objective evidence that an impairment loss has been incurred, the amount of the loss is measured as the difference between the asset’s carrying amount and the present value of the estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial assets’ original effective interest rate (i.e., the effective interest rate computed at initial recognition). The carrying amount of the asset is reduced through the use of an allowance account and the amount of loss is charged to the consolidated statement of income during the period in which it arises. Interest income continues to be recognized based on the original effective interest rate of the asset. Receivables, together with the associated allowance accounts, are written off when there is no realistic prospect of future recovery and all collateral has been realized.

If, in a subsequent year, the amount of the estimated impairment loss decreases because of an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed. Any subsequent reversal of an impairment loss is recognized in consolidated statement of income, to the extent that the carrying value of the asset does not exceed its amortized cost at the reversal date.

For the purpose of a collective evaluation of impairment, financial assets are grouped on the basis of such credit risk characteristics as industry, customer type, customer location, past-due status and term. Future cash flows in a group of financial assets that are collectively evaluated for impairment are estimated on the basis of historical loss experience for assets with credit risk characteristics similar to those in the group. Historical loss experience is adjusted on the basis of current observable data to reflect the effects of current conditions that did not affect the period on which the historical loss experience is based and to remove the effects of conditions in the historical period that do not exist currently. The methodology and assumptions used for estimating future cash flows are reviewed regularly by the Group to reduce any differences between loss estimates and actual loss experience.

Financial assets carried at cost
If there is an objective evidence that an impairment loss has been incurred on an unquoted equity instrument that is not carried at fair value because its fair value cannot be reliably measured, the amount of the loss is measured as the difference between the carrying amount and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset.

AFS financial assets
In case of AFS financial assets classified as equity investments, impairment would include a significant or prolonged decline in the fair value of the investments below its cost. Where there is evidence of impairment, the cumulative loss - measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognized in the consolidated statement of income - is removed from equity and recognized in the consolidated statement of income under “Other charges” account. Impairment losses on equity investments are not reversed through the consolidated statement of income. Increases in fair value after impairment are recognized directly in consolidated statement of changes in equity.

In the case of AFS financial assets classified as debt instruments, impairment is assessed based on the same criteria as financial assets carried at amortized cost. Future interest income is based on the reduced carrying amount and is accrued using the rate of interest used to discount future cash flows for the purpose of measuring impairment loss and is recorded as part of “Interest income” account in the consolidated statement of income. If, in subsequent year, the fair value of a debt instrument increased and the increase can be objectively related to an event occurring after the impairment loss was recognized, the impairment loss is reversed through the consolidated statement of income.

Offsetting Financial Instruments
Financial assets and financial liabilities are only offset and the net amount reported in the consolidated statement of financial position when there is a legally enforceable right to set off the recognized amounts and the Group intends to either settle on a net basis, or to realize the asset and settle the liability simultaneously.

Derecognition of Financial Assets and Liabilities

Financial assets

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognized when:

- the rights to receive cash flows from the asset have expired;
- the Group retains the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a 'pass through' arrangement; or
- the Group has transferred its rights to receive cash flows from the asset and either: (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

Where the Group has transferred its rights to receive cash flows from an asset and has neither transferred nor retained substantially all the risk and rewards of the asset nor transferred control of the asset, the asset is recognized to the extent of the Group's continuing involvement in the asset. Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

Financial liabilities

A financial liability is derecognized when the obligation under the liability is discharged or canceled or has expired.

Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in the consolidated statement of income.

Inventories

Inventories are valued at the lower of aggregate cost or net realizable value (NRV). NRV is the estimated replacement cost or the selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale. Costs incurred in bringing each product to its present location and conditions are accounted for as follows:

Coal inventory

The cost of coal inventory is determined using the weighted average production cost method. The cost of extracted coal includes all stripping costs and other mine related costs incurred during the period and allocated on per metric ton basis by dividing the total production cost with the total volume of coal produced. Except for shiploading cost, which is a component of total minesite cost, all other costs are charged to production cost.

Nickel ore inventory

The cost of extracted nickel ore includes all direct materials, labor, fuel, outside services and other mine-related costs incurred during the period and allocated on per metric ton basis by dividing the total production cost with total volume of nickel ore produced. Except for shiploading cost, which is a component of total minesite cost, all other costs are charged to production cost.

Materials-in-transit
Cost is determined using the specific identification basis.

Equipment parts and supplies
The cost of equipment parts, materials and supplies is determined principally by the average cost method (either by moving average or weighted average production cost).

Real estate held for sale and development
Property acquired or being constructed for sale in the ordinary course of business, rather than to be held for rental or capital appreciation, is held as Real estate held for sale and development. Real estate held for sale and development consists of residential units for sale and development, subdivision land for sale and development. Costs include those costs of acquisition, development, improvement and construction of the real estate projects. Borrowing costs are capitalized while the development and construction of the real estate projects are in progress, and to the extent that these are expected to be recovered in the future.

Investments in Associates, Jointly Controlled Entities and Others
Investments in associates and jointly controlled entities (investee companies) are accounted for under the equity method of accounting.

An associate is an entity in which the Group has significant influence and which is neither a subsidiary nor a joint venture. A joint venture is a contractual arrangement whereby two or more parties undertake an economic activity that is subject to joint control, and a jointly controlled entity is a joint venture that involves the establishment of a separate entity in which each venturer has an interest.

Under the equity method, the investments in the investee companies are carried in the consolidated statement of financial position at cost plus post-acquisition changes in the Group's share in the net assets of the investee companies, less any impairment in value. Goodwill relating to an associate is included in the carrying amount of the investment and is not amortized. The Group's share in the investee's post acquisition profit or loss is recognized in the consolidated satatement of income. Profit and losses resulting from transactions between the Group and the investee companies are eliminated to the extent of the interest in the investee companies.

The Group discontinues applying the equity method when their investments in investee companies are reduced to zero. Accordingly, additional losses are not recognized unless the Group has guaranteed certain obligations of the investee companies. When the investee companies subsequently report net income, the Group will resume applying the equity method but only after its share of that net income equals the share of net losses not recognized during the period the equity method was suspended.

The reporting dates of the investee companies and the Group are identical and the investee companies' accounting policies conform to those used by the Group for like transactions and events in similar circumstances.

Upon loss of significant influence over the associate, the Group measures and recognizes any retaining investment at its fair value. Any difference between the carrying amount of the associate upon loss of significant influence and the fair value of the retaining investment and proceeds from disposal is recognized in the consolidated statement of income.

Investment in Jointly Controlled Assets

A jointly controlled asset involves joint control and ownership by the Group and other venturers of assets contributed to or acquired for the purpose of the joint venture, without the formation of a corporation, partnership or other entity. The Group accounts for its share of the jointly controlled assets, any liabilities it has incurred, its share of any liabilities jointly incurred with other ventures, income from the sale or use of its share of the joint venture's output, together with its share of the expenses incurred by the joint venture, and any expenses it incurs in relation to its interest in the joint venture.

Investment Properties

Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties, except land, are stated at cost less accumulated depreciation and any impairment in value. Land is stated at cost less any impairment in value. The carrying amount includes the cost of replacing part of an existing investment property at the time that cost is incurred if the recognition criteria are met and excludes the cost of day-to-day servicing of an investment property.

Investment properties are derecognized when they have either been disposed of or when the investment property is permanently withdrawn from use and no future benefit is expected from its disposal. Any gain or loss on the retirement or disposal of an investment property is recognized in the consolidated statement of income in the year in which it arises.

Expenditures incurred after the investment properties have been put into operations, such as repairs and maintenance costs, are normally charged to consolidated statements of income in the period in which the costs are incurred.

Depreciation and amortization is calculated on a straight-line basis using the following estimated useful lives (EUL) from the time of acquisition of the investment properties. The EUL of the investment properties follow:

	Years
Buildings and building improvements	5-25
Condominium units	5

Transfers are made to investment property when, and only when, there is a change in use, evidenced by the end of owner occupation, commencement of an operating lease to another party or completion of construction or development. Transfers are made from investment property when, and only when, there is a change in use, as evidenced by commencement or owner occupation or commencement of development with a view to sale.

For a transfer from investment property to owner occupied property, the deemed cost of property for subsequent accounting is its fair value at the date of change in use. If the property occupied by the Group as an owner occupied property becomes an investment property, the Group accounts for such property in accordance with the policy stated under property, plant and equipment up to the date of change in use. When the Group completes the construction or development of a self constructed investment property, any difference between the fair value of the property at that date and its previous carrying amount is recognized in the consolidated statement of income.

Mine Exploration, Evaluation and Development Costs

Pre-license costs

Pre-license costs are expensed in the period in which they are incurred.

Exploration and evaluation costs

Once the legal right to explore has been acquired, exploration and evaluation expenditure is charged to the consolidated statement of income as incurred, unless the directors conclude that a future economic benefit is more likely than not to be realized. These costs include materials and fuel used, surveying costs, drilling costs and payments made to contractors.

In evaluating if expenditures meet the criteria to be capitalized, several different sources of information are utilized. The information that is used to determine the probability of future benefits depends on the extent of exploration and evaluation that has been performed.

Exploration and evaluation expenditure incurred on licenses where a Joint Ores Reserve Committee (JORC) compliant resource has not yet been established is expensed as incurred until sufficient evaluation has occurred in order to establish a JORC compliant resource. Costs incurred during this phase are included as part of production cost.

Upon the establishment of a JORC compliant resource (at which point, the Group considers it probable that economic benefits will be realised), the Group capitalises any further evaluation costs incurred for the particular licence to exploration and evaluation assets up to the point when a JORC compliant reserve is established.

Once JORC compliant reserves are established and development is sanctioned, exploration and evaluation assets are tested for impairment and transferred to 'Mines under construction'. No amortization is charged during the exploration and evaluation phase.

Mines under construction

Upon transfer of 'Exploration and evaluation costs' into 'Mines under construction', all subsequent expenditure on the construction, installation or completion of infrastructure facilities is capitalized within "Mines under construction". Development expenditure is net of proceeds from all but the incidental sale of ore extracted during the development phase. After production starts, all assets included in "Mines under construction" are transferred to "Mining equipment".

Mine development costs are derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the assets. Any gain or loss arising on the derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the assets) is included in the consolidated statement of income in the year the item is derecognized.

Property, Plant and Equipment

Property, plant and equipment, except land, are stated at cost less accumulated depreciation and amortization, and any impairment in value. Land is stated at cost, less any impairment in value.

The initial cost of property, plant and equipment comprises its purchase price, including import duties, taxes and any directly attributable costs of bringing the asset to its working condition and location for its intended use. Costs also include decommissioning and site rehabilitation cost. Expenditures incurred after the property, plant and equipment have been put into operation, such as repairs and maintenance and overhaul costs, are normally charged to operations in the period in which the costs are incurred. In situations where it can be clearly demonstrated that the expenditures have resulted in an increase in the future economic benefits expected to be obtained from the use of an item of property, plant and equipment beyond its originally assessed standard of performance, the expenditures are capitalized as additional cost of property, plant and equipment.

Construction in progress included in property, plant and equipment is stated at cost. This includes the cost of the construction of property, plant and equipment and other direct costs.

Depreciation, depletion and amortization of assets commences once the assets are put into operational use.

Depreciation, depletion and amortization of property, plant and equipment are calculated on the straight-line basis over the following EUL of the respective assets or the remaining contract period, whichever is shorter:

	Years
Land improvements	5-17
Power plant, buildings and building improvements	5-25
Construction equipment, machinery and tools	5-10
Office furniture, fixtures and equipment	3-5
Transportation equipment	4-5
Conventional and continuous mining properties and equipment	2-13
Leasehold improvements	5-7

The EUL and depreciation, depletion and amortization methods are reviewed periodically to ensure that the period and methods of depreciation, depletion and amortization are consistent with the expected pattern of economic benefits from items of property, plant and equipment.

An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the item) is included in the consolidated statement of income in the year the item is derecognized.

Provision for decommissioning and site rehabilitation costs
The Group is legally required to fulfill certain obligations as required under its Environmental Compliance Certificate (ECC) issued by Department of Environment and Natural Resources (DENR). The Group recognizes the present value of the liability for these obligations and capitalizes the present value of these costs as part of the balance of the related property, plant and equipment accounts which are depreciated, depleted and amortized on a straight-line basis over the EUL of the related property, plant and equipment or the contract period, whichever is shorter. The decommissioning and site rehabilitation costs are determined based on the provisions of PAS 37, *Provisions, Contingent Liabilities and Contingent Assets*. The Group recognizes the liability for these obligations as “Provision for decommissioning and site rehabilitation” under “Other noncurrent liabilities” in the consolidated statement of financial position.

Intangible Assets

Intangible assets acquired separately are capitalized at cost and these are shown as part of the other noncurrent assets account in the consolidated statement of financial position. Following initial recognition, intangible assets are measured at cost less accumulated amortization and provisions for impairment losses, if any. The useful lives of intangible assets with finite life are assessed at the individual asset level. Intangible assets with finite life are amortized over their EUL. The perios and method of amortization for intangible assets with finite useful lives are reviewed annually or earlier where an indicator of impairment exists.

Costs incurred to acquire and bring the computer software (not an integral part of its related hardware) to its intended use are capitalized as part of intangible assets. These costs are amortized over their EUL ranging from 3 to 5 years. Costs directly associated with the development of identifiable computer software that generate expected future benefits to the Group are recognized as intangible assets. All other costs of developing and maintaining computer software programs are recognized as expense when incurred.

Gains or losses arising from the derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the consolidated statement of income when the asset is derecognized.

Input VAT

Input VAT represents VAT imposed on the Group by its suppliers and contractors for the acquisition of goods and services required under Philippine taxation laws and regulations.

The input VAT that will be used to offset the Group's current VAT liabilities is recognized as a current asset. Input VAT representing claims for refund from the taxation authorities is recognized as a noncurrent asset. Input taxes are stated at their estimated net realizable value.

Impairment of Nonfinancial Assets

This accounting policy applies primarily to the Group's property, plant and equipment, investment properties and investments in associates and jointly controlled entities.

The Group assesses at each reporting date whether there is an indication that an asset may be impaired. If any such indication exists, or when an annual impairment testing for an asset is required, the group makes an estimate of the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash generating unit's fair value less cost to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that largely independent of those from other assets or group of assets. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. If that is the case, the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation, depletion and amortization, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the consolidated statement of income unless the asset is carried at revalued amount, in which case the reversal is treated as a revaluation increase.

Intangible assets with indefinite useful lives are tested for impairment annually as of reporting date either individually or at the cash generating unit level, as appropriate.

<u>Equity</u>
The Group records common stocks at par value and additional paid-in capital in excess of the total contributions received over the aggregate par values of the equity share. Incremental costs incurred directly attributable to the issuance of new shares are deducted from the proceeds.

Retained earnings represent accumulated earnings of the Group less dividends declared.

<u>Treasury Shares</u>
Treasury shares are recorded at cost and are presented as a deduction from equity. When the shares are retired, the capital stock account is reduced by its par value. The excess of cost over par value upon retirement is debited to the following accounts in the order given: (1) additional
paid-in capital to the extent of the specific or average additional paid-in capital when the shares were issued; and, (2) retained earnings.

<u>Minority Interests</u>
Minority interests represent the portion of profit or loss and the net assets not held by the Parent Company and are presented separately in the consolidated statement of income and within equity in the consolidated statement of financial position, separately from total equity attributable to owners of the Parent Company. Any losses applicable to a minority shareholder of a consolidated subsidiary in excess of the minority shareholder's equity in the subsidiary are charged against the minority interests to the extent that the minority shareholder has binding obligation to, and is able to, make good of the losses.

<u>Revenue and Cost Recognition</u>
Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured. The following specific recognition criteria must also be met before revenue is recognized:

Mining
Revenue from mining is recognized upon delivery when the significant risks and rewards of ownership of the goods have passed to the buyer and the amount of revenue can be measured reliably. Revenue from local and export coal sales are denominated in Philippine Pesos and US Dollars, respectively.

Electricity sales
Revenue from sale of electricity is derived from its primary function of providing and selling electricity to customers of its generated and purchased electricity. Revenue derived from the generation and/or supply of electricity is recognized based on the actual delivery of electricity as agreed upon between parties.

Real estate sales
Real estate sales are generally accounted for under the full accrual method. Under this method, the gain on sale is recognized when: (a) the collectibility of the sales price is

reasonably assured; (b) the earnings process is virtually complete; and (c) the seller does not have a substantial continuing involvement with the subject properties. The collectibility of the sales price is considered reasonably assured when: (a) the buyers have actually confirmed their acceptance of the related loan applications after the same have been delivered to and approved by either the banks or other financing institutions for externally-financed accounts; or (b) the full down payment comprising a substantial portion of the contract price is received and the capacity to pay and credit worthiness of buyers have been reasonably established for sales under the deferred cash payment arrangement.

If the above criteria is not met, the deposit method is applied until all the conditions for recording a sale are met. Pending recognition of sale, cash received from buyers are presented under the “Customers’ advances and deposits” account in the liabilities section of the consolidated statement of financial position.

Construction contracts
Revenue from construction contracts is recognized using the percentage-of-completion method of accounting and is measured principally on the basis of the estimated completion of a physical proportion of the contract work. Contracts to manage, supervise, or coordinate the construction activity of others and those contracts wherein the materials and services are supplied by contract owners are recognized only to the extent of the contracted fee revenue. Revenue from cost plus contracts is recognized by reference to the recoverable costs incurred during the period plus the fee earned, measured by the proportion that costs incurred to date bear to the estimated total costs of the contract.

Contract costs include all direct materials and labor costs and those indirect costs related to contract performance. Expected losses on contracts are recognized immediately when it is probable that the total contract costs will exceed total contract revenue. The amount of such loss is determined irrespective of whether or not work has commenced on the contract; the stage of completion of contract activity; or the amount of profits expected to arise on other contracts, which are not treated as a single construction contract. Changes in contract performance, contract conditions and estimated profitability, including those arising from contract penalty provisions and final contract settlements that may result in revisions to estimated costs and gross margins are recognized in the year in which the changes are determined. Profit incentives are recognized as revenue when their realization is reasonably assured.

The asset “Costs and estimated earnings in excess of billings on uncompleted contracts” represents total costs incurred and estimated earnings recognized in excess of amounts billed. The liability “Billings in excess of costs and estimated earnings on uncompleted contracts” represents billings in excess of total costs incurred and estimated earnings recognized. Contract retentions are presented as part of “Trade receivables” under the “Receivables” account in the consolidated statement of financial position.

Merchandise sales
Revenue from merchandise sales is recognized upon delivery of the goods to and acceptance by the buyer and when the risks and rewards are passed on to the buyers.

Dividend income
Revenue is recognized when the Group’s right to receive payment is established.

Rental income
Rental income arising from operating leases on investment properties and construction equipment is accounted for on a straight-line basis over the lease terms.

Interest income
Revenue is recognized as interest accrues using the effective interest method that is the rate that exactly discounts estimated future cash receipts through the expected life of the financial instrument to the net carrying amount of the financial asset.

Operating Expenses
Operating expenses are expenses that arise in the course of the ordinary operations of the Group. These usually take the form of an outflow or depletion of assets such as cash and cash equivalents, supplies, investment properties and property, plant and equipment. Expenses are recognized in the consolidated statement of income.

Borrowing Costs
Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective assets. All other borrowing costs are expensed in the period they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

The interest capitalized is calculated using the Group's weighted average cost of borrowings after adjusting for borrowings associated with specific developments. Where borrowings are associated with specific developments, the amounts capitalized is the gross interest incurred on those borrowings less any investment income arising on their temporary investment. Interest is capitalized from the commencement of the development work until the date of practical

completion. The capitalization of finance costs is suspended if there are prolonged periods when development activity is interrupted. Interest is also capitalized on the purchased cost of a site property acquired specially for development but only where activities necessary to prepare the asset for development are in progress.

The Group capitalized borrowing costs for all eligible assets where construction commenced on or after January 1, 2009. The Group continues to expense borrowing costs relating to construction projects that commenced prior to January 1, 2009.

Foreign Currency Translations
The functional and presentation currency of the Parent and its Philippine subsidiaries (except for AG&P Nouvelle Caledonie), is the Philippine Peso. Each entity in the Group determines its own functional currency and items included in the financial statements of each entity are measured using that functional currency.

Transactions in foreign currencies are initially recorded by the Group entities at their respective functional currency rates prevailing at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency spot rate of exchange ruling at the reporting date. All differences are taken to the consolidated statement of income.

The functional currency of the foreign operations, AG&P-Nouvelle Caledonie, is the Pacific Franc (XPF). As at the reporting date, the assets and liabilities of this subsidiary are translated into the presentation currency of the Group at the rate of exchange ruling at the reporting date and its statement of income accounts are translated at the weighted average exchange rates for the year. The exchange differences arising on the translation are recognized in the consolidated statement of comprehensive income and reported as a separate component of equity. On disposal of a foreign entity, the deferred cumulative amount recognized in the consolidated statement of comprehensive income relating to that particular foreign operation shall be recognized in the consolidated statement of income.

The Group's share in the associate's translation adjustments are likewise included under the cumulative translation adjustments account in the consolidated statement of financial position.

Commission Expense

The Group recognizes commission expense when services are rendered by the broker. The commission expense is recognized upon receipt of down payment from the buyer comprising a substantial portion of the contract price and the capacity to pay and credit worthiness of buyers have been reasonably established for sales under the deferred cash payment arrangement.

Pension Expense

The Group has a noncontributory defined benefit retirement plan.

The retirement cost of the Group is determined using the projected unit credit method. Under this method, the current service cost is the present value of retirement benefits payable in the future with respect to services rendered in the current period. The defined benefit asset or liability comprises the present value of the defined benefit obligation less past service costs not yet recognized, if any, less the fair value of the plan assets out of which the obligations are to be settled directly and less any actuarial gains or losses not recognized. The value of any asset is restricted to the sum of any past service costs not yet recognized, if any, and the present value of any economic benefits available in the form of refunds from the plan or reductions in the future contributions to the plan.

The defined benefit obligation is calculated annually by an independent actuary using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using prevailing interest rate on government bonds that have terms to maturity approximating the terms of the related retirement liability.

Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are credited to or charged against income when the net cumulative unrecognized actuarial gains and losses at the end of the previous period exceeded 10% of the higher of the present value of the defined benefit obligation and the fair value of plan assets at that date. These gains or losses are recognized over the expected average remaining working lives of the employees participating in the plan.

Past-service costs, if any, are recognized immediately in income, unless the changes to the pension plan are conditional on the employees remaining in service for a specified period of time (the vesting period). In this case, the past-service costs are amortized on a straight-line basis over the vesting period.

Plan assets are assets that are held by a long-term employee benefit fund or qualifying insurance policies. Plan assets are not available to the creditors of the Group, nor can they be paid directly to the Group. Fair value is based on market price information and in the case of quoted securities it is the published bid price. The value of any defined benefit asset recognized is restricted to the sum of any past service costs and actuarial gains and losses not yet recognized and the present value of any economic benefits available in the form of refunds from the plan or reductions in the future contributions to the plan.

The retirement benefits of officers and employees are determined and provided for by the Group and are charged against current operations.

Leases

The determination of whether an arrangement is, or contains a lease is based on the substance of the arrangement and requires an assessment of whether the fulfillment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset.

Group as a lessee

Operating lease payments are recognized as an expense in the consolidated statement of income on a straight basis over the lease term.

Group as a lessor

Leases where the Group retains substantially all the risks and benefits of ownership of the asset are classified as operating leases. Initial direct costs incurred in negotiating an operating lease are added to the carrying amount of the leased asset and recognized over the lease term on the same bases as rental income.

Income Tax

Current tax

Current tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantially enacted at the reporting date.

Deferred tax

Deferred income tax is provided, using the liability method, on all temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax liabilities are recognized for all taxable temporary differences, except:

- where the deferred tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and

- in respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognized for all deductible temporary differences, carry forward of unused tax credits from excess minimum corporate income tax (MCIT) and unused net operating loss carry over (NOLCO), to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and the carry forward of unused tax credits and unused NOLCO can be utilized except:

- where the deferred tax asset relating to the deductible temporary differences arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and

- in respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized. Unrecognized deferred tax assets are reassessed at each reporting date and are recognized to the extent that it has become probable that future taxable profit will allow all or part of the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rate that are expected to apply to the period when the asset is realized or the liability is settled, based on tax rate (and tax laws) that have been enacted or substantially enacted at the reporting date.

Income tax relating to items recognized directly in equity is recognized in equity and not in the consolidated statement of income.

Earnings per Share

Basic earnings per share (EPS) is computed by dividing the net income for the year attributable to common shareholders (net income for the period less dividends on convertible redeemable preferred shares) by the weighted average number of common shares issued and outstanding during the year and adjusted to give retroactive effect to any stock dividends declared during the period.

Diluted EPS is computed by dividing the net income for the year attributable to common shareholders by the weighted average number of common shares outstanding during the year adjusted for the effects of dilutive convertible redeemable preferred shares. Diluted EPS assumes the conversion of the outstanding preferred shares. When the effect of the conversion of such preferred shares is anti-dilutive, no diluted EPS is presented.

Operating Segment

The Group’s operating businesses are organized and managed separately according to the nature of the products and services provided, with each segment representing a strategic business unit that offers different products. Financial information on operating segments is presented in
Note 33 to the consolidated financial statements.

Provisions
A provision is recognized only when the Group has: (a) a present obligation (legal or constructive) as a result of a past event; (b) it is probable (i.e., more likely than not) that an outflow of resources embodying economic benefits will be required to settle the obligation; and (c) a reliable estimate can be made of the amount of the obligation. If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessment of the time value of money and, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as an interest expense. Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate.

Contingencies
Contingent liabilities are not recognized in the consolidated financial statements. These are disclosed unless the possibility of an outflow of resources embodying economic benefits is remote. Contingent assets are not recognized but are disclosed in the consolidated financial statements when an inflow of economic benefits is probable.

Events After the Reporting Period
Post year-end events up to the date of the auditors' report that provide additional information about the Group's position at reporting date (adjusting events) are reflected in the consolidated financial statements. Any post year-end events that are not adjusting events are disclosed in the the consolidated financial statements when material.

Business Combinations
Business combinations are accounted for using the purchase method. The cost of an acquisition is measured as the fair value of the assets given, equity instruments issued and liabilities incurred or assumed at the date of exchange, plus costs directly attributable to the acquisition. Identifiable assets (including previously unrecognized intangible assets) acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the date of acquisition, irrespective of the extent of any noncontrolling interest.

PFRS 3 provides that if the initial accounting for a business combination can be determined only provisionally by the end of the period in which the combination is effected because either the fair values to be assigned to the acquireee's identifiable assets, liabilities or contingent liabilities or the cost of the combination can be determined only provisionally, the acquirer shall account for the combination using those provisional values. The acquirer shall recognize any adjustments to those provisional values as a result of completing the initial accounting within twelve months of the acquisition date as follows: (i) the carrying amount of the identifiable asset, liability or contingent liability that is recognized or adjusted as a result of completing the initial accounting shall be calculated as if its fair value at the acquisition date had been recognized from that date; (ii) goodwill or any gain recognized shall be adjusted by an amount equal to the adjustment to the fair value at the acquisition date of the identifiable asset, liability or contingent liability being recognized or adjusted; and (iii) comparative information presented for the periods before the initial accounting for the combination is complete shall be presented as if the initial accounting has been completed from the acquisition date.

Acquisition of Minority Interests in a Subsidiary
Acquisition of minority interests is accounted for using the parent entity extension method, whereby the difference between the fair value of consideration given and the net book value

of the share in the net assets acquired is recognized as goodwill. When the consideration is less than the net assets acquired, the difference is recognized as a gain in the consolidated statement of income. In an acquisition without consideration involved, the difference between the share of the minority interests in the net assets at book value before and after the acquisition is recognized either as goodwill or a gain from acquisition of minority interests.

3. Preferred and Common Stock

The changes in the number of shares follow:

	June 30, 2010	December 31, 2009
Preferred stock - ₱1 par value cumulative and convertible to common stock		
Authorized number of shares	**100,000,000**	**100,000,000**
Issued and outstanding		
Balance at beginning of year	**4,380**	**4,380**
Cancellation/retirement of issued preferred shares	**0**	**0**
Balance at end of year	**4,380**	**4,380**
Common stock - ₱1 par value		
Authorized number of shares	**5,900,000,000**	**5,900,000,000**
Issued and outstanding	**2,655,494,000**	**2,655,494,000**
Additional subscription	**-**	**-**
Preferred shares held in treasury		
Balance at beginning of year	**0**	**0**
Redemption of preferred shares	**0**	**0**
Cancellation/retirement of issued preferred shares	**0**	**0**
Balance at end of year	**0**	**0**

The preferred stock is redeemable, convertible, non-voting, non-participating and cumulative with par value of ₱1.00 per share. The preferred shareholders' right of converting the preferred shares to common shares expired in March 2002. Aside from the issued and outstanding 4,380 preferred shares, all the preferred shares were essentially redeemed, retired, cancelled and paid.

Appropriation
Retained earnings is restricted to the extent of the acquisition cost of the treasury shares amounting to ₱1.10 million and ₱187.21 million as of December 31, 2006 and 2005, respectively. No retained earnings have been currently appropriated for acquisition of treasury shares.

Dividends declared
On June 4, 2010 and May 21, 2009 the Parent Company's BOD approved and declared cash dividend of ₱0.50 and P0.20 per share or ₱1,328 million and ₱531 million respectively to stockholders of record as of June 22, 2010 and June 15, 2009, respectively. The cash dividend was paid on July 15, 2010 and June 30, 2009 respectively as well.

4. **Business Segments**

The following tables present the net income of the specific business segments for the period and quarter ended June 30, 2010 and 2009 (amounts in thousand):

Revenues

	For the period		For the Quarter	
	2010	2009	2010	2009
Construction	7,326,545	3,548,535	3,848,019	1,998,013
Mining	7,881,196	6,355,744	4,068,277	3,124,302
Water	-	-	-	-
Real Estate Development	2,400,243	1,867,634	1,648,267	778,699
Electricity	5,956,811	-	3,465,734	-
Parent Company and Others	71,838	245,262	39,218	157,731
TOTAL	**23,636,633**	**12,017,175**	**13,069,515**	**6,058,745**

Net Income After Minority

	For the period		For the Quarter	
	2010	2009	2010	2009
Construction	945,266	325,346	444,869	145,180
Mining	830,364	407,052	512,049	163,354
Water	905,835	1,120,984	515,074	337,064
Real Estate Development	764,382	299,410	598,832	133,735
Electricity	734,956	-	702,641	-
Parent Company and Others	1	3,640	(1,258)	(4,334)
TOTAL	**4,180,804**	**2,156,432**	**2,774,727**	**774,999**

5. **Operating Expenses**

The following tables present the consolidated operating expenses for the period ended June 30, 2010 and 2009:

	JUNE 2010	JUNE 2009
Government Share	1,016,269,467.00	633,857,097.00
Salaries, Wages & Employees benefits	366,061,960.57	242,920,333.56
Advertising and Marketing Expense	128,192,357.04	78,770,226.26
Commission	183,248,059.47	113,167,875.77
Outside Services	47,296,463.78	27,892,457.01
Taxes and Licenses	493,732,616.97	118,965,916.32
Depreciation Expense	108,037,025.95	78,774,293.76
Professional Fees	58,929,791.36	26,789,993.22
Entertainment, amusement and recreation	18,142,426.59	12,786,346.47
Rental Expense	19,840,591.87	14,547,587.42
Transportation and Travel	17,997,085.31	9,778,515.92
Communication, light and water	40,700,685.18	29,840,434.70
Repairs and Maintenance	43,266,131.17	21,580,539.79
Gasoline and Oil Expense	8,516,385.56	6,180,877.56
Supplies	44,781,598.48	33,394,946.16
Insurance	32,090,470.51	23,156,645.46
Other Operating Expense	78,953,958.44	46,831,060.37
		-
TOTAL	**2,706,057,075.25**	**1,519,235,146.75**

6. **Related Party Transactions**

In the regular course of business, the Group's significant transactions with related parties consisted primarily of the following:

(a) Comprehensive surety, corporate and letters of guarantee issued by the Company and DMCI for various credit facilities granted to and for full performance of certain obligations by certain related parties.
(b) Certain assets of the Group, associates and other related parties were placed under accommodation mortgages to secure the indebtedness of the Group, its associates and other related parties.
(c) Interest and non interest-bearing cash and operating advances made by the Group to and from various associates and other related parties.
(d) Engineering and construction works of the water business is contracted to the construction segment of the Company. These projects are bidded out to various contractors and are awarded on arms length transactions. The interrelated contracts amounted to Php 3,133,129,334.59 and Php 2,444,361,212.58 as of June 30, 2010 and June 30, 2009 respectively, where Php 1,062,735,042.83 and Php 340,176,666.72 were booked for the period ended June 30, 2010 and June 30, 2009 respectively.

7. **Financial Instruments and Financial Risk**

For interim reporting purposes, financial assets and liabilities are recognized at historical cost which is the fair value of the consideration given (in the case of the asset) or received (in the case of liability). Debt issuance costs are included in the initial measurement of all financial assets and liabilities except those that are designated as fair value through profit and loss.

ACCOUNTS RECEIVABLE DESCRIPTION
JUNE 30, 2010

Type of Receivable	Nature/Description	Collection Period
1) Contracts/Retention Receivable	Construction contract billings, sale of Goods and services pertaining to construction and related businesses of subsidiaries; real estate sales like sale of condominium units; development, improvements and construction of real estate projects; and coal mining sales	Contract Receivable - 20 to 30 days upon submission of progress billing Retention Receivable (10%) - depends on the agreement: 1) usually, 60 days after completion and acceptance of the project 2) if 50% completed, can bill 50% of retained amount as specified in the contract agreement Coal Mine Receivable - 1) Average standard term 80% of sales - 30 days upon presentation of invoice 20% of sales - 35 to 45 days term upon receipt of test results 2) Actual term - 45 to 60 days after billing Real Estate Receivable terms: Upon sale - 1) Reservation Fee - P 20,000.00 2) Balance paid through in-house or pag-ibig financing
2) Advances	Includes Advances to Suppliers, sub-contractors, and advances to employees/subject for liquidation	
3) Affiliates	Includes Advances to Subsidiaries and Affiliates	
4) Other Receivables	Includes refundable deposits, claims from some government agency like SSS, BIR and other receivables from miscellaneous billings	

Normal Operating Cycle

1.) Construction and Real Estate - positive net working capital
2) Mining - positive net working capital
