Clarification of News Report: DMCI Power invests P745M in Masbate

Source	Manila Bulletin (Online Edition)
Subject of News Report	DMCI Power invests P745M to boost Masbate supply
Date of Publication	Dec 6, 2022

Clarification of News Report

We reply to your request for clarifications on the news article entitled DMCI Power invests P745M to boost Masbate supply posted in the Manila Bulletin (Online Edition) on December 6, 2022, which reported in part that:

“DMCI Power Corporation (DPC), the off-grid energy solutions company of the Consunji group, has coughed up P745 million worth of fresh investment to augment power supply into brownout-stricken Masbate province.

The company said the new investment ensures the installation of 11-megawatt generating facility, boosting Masbate’s electricity supply by as much as 21 percent.

.....

According to DPC President Antonino E. Gatdula, Jr., one plant is already operational while the other is set to run within the month. Gatdula said the “investment is in line with our commitment to provide adequate, reliable and dependable power supply in missionary areas” or jurisdictions that are not physically connected to the main power grids.

On Nov. 4 this year, DPC deployed and operated a 3.0MW diesel plant in Pio V. Corpuz while final testing and commissioning of another 8.0MW diesel power generating facility in Cataingan is ongoing and target commercial operation date is by mid-December.

.....

Forthcoming in the company’s target will be the integration of solar in its power mix for the off-grid domains – including for the capacity buildup that it has been pursuing for Masbate province.

‘Next year, we are targeting to include solar energy in our mix. We have a 4.0MW solar plant that’s set to operate in Masbate by fourth quarter of 2023,’ Gatdula said

DMCI Power News Clarification
Dec. 6, 2022

Off-grid energy player DMCI Power Corporation (DPC) spent around P745 million to install an additional 11 megawatts (MW) of generation capacity in Masbate, boosting its total installed capacity in the province by 21% percent.

“One plant is already operational while the other is set to run within the month. These investments are in line with our commitment to provide adequate, reliable and dependable power supply in missionary areas,” said DPC president Antonino E. Gatdula, Jr.

For the nine months ending in September, energy sales in Masbate increased by 11 percent from 100GWh to 111GWh on robust demand.

Last November 4, DPC deployed and operated a 3MW diesel plant in Pio V. Corpuz. Meanwhile, final testing and commissioning of an 8MW diesel power plant in Cataingan is currently underway. The Cataingan plant is targeted to go online by mid-December.

With the additional plants, DPC now has a consolidated installed capacity of 148MW located across Masbate, Palawan and Oriental Mindoro. Its energy portfolio includes diesel, bunker and thermal.

“Next year, we are targeting to include solar energy in our mix. We have a 4MW solar plant that’s set to operate in Masbate by 4th quarter of 2023,” Gatdula added.

DPC was established in 2006 to energize the small and remote islands in the country that are not connected to the main power grid. It is currently the biggest off-grid power provider in the Philippines. ###
