This is to inform the investing public of the following Press Release.

DMCI Mining shipments hit record high in H1

DMCI Mining shipped 1.24 million wet metric tons (WMT) of nickel ore from January to June, an all-time high for the company and 45 percent higher compared to the 853,000 MWT shipped during the same period last year.

Of the total shipments, 718,000 WMT came from Berong Nickel Corporation (BNC) while Zambales Diversified Metals Corporation (ZDMC) contributed 522,000 WMT.

“This is the first time that both our mining assets are operating at full capacity. We expect shipments to remain strong in the second half since we were able to extend Berong’s mine life from June until Q3 this year,” said DMCI Mining president Tulsi Das C. Reyes.

Average nickel grade of the shipped nickel dropped from 1.37% to 1.39% while average selling price per metric ton rallied 57 percent from USD28 to USD44 owing to China’s surging stainless steel production, strong demand for electric vehicles and the continuing Indonesian nickel ore export ban.

“The uptrend in nickel prices is likely to continue in the coming months because of production-consumption gaps. Major nickel producers are seeing lower output because of COVID-19 lockdowns and various operating issues but industrial manufacturing is still ramping up,” Reyes added.

DMCI Mining revenues in the first half grew 123 percent from P1.2 billion to P2.7 billion. Including a nonrecurring income of P247 million mainly due to deferred tax liability remeasurement and 2020 income tax adjustment under CREATE Act, its standalone net income soared 409 percent from P241 million to P1.2 billion.

Nickel is mainly used in stainless steelmaking, but is also a vital ingredient for the lithium-ion batteries used to power electric vehicles (EV). The International Energy Agency estimates that global EVs will grow 14 times to 145 million by 2030.
